Summary

I am a full stack developer that has spent 10 years in the customer service field, running a business that has over 1M OCF and a 4.8 average star rating. However, programming has always been a passion and goal, with merging creative ideas with a technical know how. Utilizing Javascript to its full power with Node, Express, and React will lead to creating and supporting your products.

Technical Skills

Technical: Node • Express • React • Sequelize/MySQL • MongoDB • PWA • Object Oriented Programming
Languages: Javascript • HTML 5/CSS • Java
Professional: Works well under pressure • Communication • Teamwork • Organization

Projects

Tech Blog | github.com/mpityo/tech-blog | tech-blog-211.herokuapp.com
SQL • Sequelize • Node • Express • bcrypt • CSS • HTML5

A *full-stack application* designed to allow users to talk about tech related news and products. Features a SQL database, backend routing for comments, likes, posts, and a sleek and ituative front end design. Also utilizes encryption for user passwords, and environmental values for secure access.

Role: Sole author

Social Network Backend | github.com/mpityo/social-network-backend
MongoDB • Mongoose • Node • Express

A *back end application* showcasing my ability to work with new softwares (MongoDB) to create a fully functional back end for a social network website. Incorporates DRY and RESTful APIs to route and manage actions including creating, deleting, updating, and getting (CRUD).

Role: Sole author

Food Festival | github.com/mpityo/food-festival | mpityo.github.io/food-festival
PWA • Webpacks • IndexedDB • Node • HTML5 • Bootstrap (CSS) • Lighthouse

A *front end PWA application* that allows users to access information about a food festival, while having low to no internet connection. Fully PWA with a downloadable application,

offline saving and uploading via IndexedDB and service workers, and optimized loading of JS and images.

Role: Back end developer

Experience

Pearson Vue – Tampa, FL   Mar 2021 - Present
Test Administrator, Part Time

- Admit and proctor 75 candidates per day, following strict guidelines from over 30 test sponsors, in a high stakes environment.
- Retain an intense attention to detail to ensure candidates have required documents, identification, and do not bring any prohibited materials into the testing room.
- Implement cleaning procedures for computers and other high use items in the office. Come up with a way to track/monitor the completion of these items and share results with the team on a monthly basis.
- Within 3 months of starting the position, train new test administrators and work at other offices to assist with coverage.

AMC Entertainment – Tampa, FL   Sep 2011 – Jul 2020
General Manager - Senior Manager - Supervisor - Film Crew

- Implement 30+ projects that support customer growth and engagement. These led to a 34% increase in yearly attendance (up to 1.1M from 700k in 3 years).
- Create a new training program for Crew Leads to train new hires more efficiently, as well as a quarterly review process for the management team to assess the Crew Leads. This ensured the up and coming leaders were placed in the best position for promotion.
- Hire, train, support, and lead a group of 6 operation managers.
- Work independently to find and solve problems before they arise. Leverage management team to find solutions and implement within a reasonable time frame.
- Compose and send emails and communications daily to fellow leaders, crew, escalated guest correspondence, and corporate partners.

Education

UCF Boot Camp   Dec 2021 - Jun 2022
Certificate - Full Stack Web Development

Hillsborough Community College – Tampa, FL
Associate of Arts – 3.75 GPA   Aug 2020 - Dec 2021

University of Florida – Gainesville, FL
Bachelor of Science – Computer Science   *Expected* Dec 2023
